

# Quality Performance Results

| 2014 Performance Summary Statistics   |                      |                                    |
|---|----------------------|------------------------------------|
| Performance Measure   | ACO Performance Rate | Mean Performance Rate for All ACOs |
| Getting Timely Care, Appointments, and Information (ACO-1)  | 84.03                | 80.13                              |
| How Well Your Doctors Communicate (ACO-2)   | 92.84                | 92.39                              |
| Patients' Rating of Doctor (ACO-3)  | 93.01                | 91.58                              |
| Access to Specialists (ACO-4)   | 86.01                | 83.97                              |
| Health Promotion and Education (ACO-5)  | 60.57                | 58.29                              |
| Shared Decision Making (ACO-6)  | 77.15                | 74.60                              |
| Health Status/Functional Status (ACO-7)   | 72.83                | 71.10                              |
| Risk Standardized, All Condition Readmissions (ACO-8)   | 13.91                | 15.15                              |
| Admissions: COPD or Asthma in Older Adults (ACO-9)  | 0.77                 | 1.08                               |
| ASC Admissions: Heart Failure (ACO – 10)  | 1.22                 | 1.19                               |
| Percent of Primary Care Providers who Qualified for EHR Incentive Repayment (ACO-11)  | 90.00                | 76.71                              |
| Medication Reconciliation (ACO-12)  | 70.5                 | 82.61                              |
| Falls: Screening for Fall Risk (ACO-13)   | 50.2                 | 45.60                              |
| Influenza Immunization (ACO-14)   | 66.5                 | 57.51                              |
| Pneumococcal Vaccination (ACO-15)   | 63.9                 | 55.03                              |
| Adult Weight Screening and Follow-up (ACO-16)   | 63.4                 | 66.75                              |
| Tobacco Use Assessment and Cessation Intervention (ACO-17)  | 88.6                 | 86.79                              |
| Depression Screening (ACO-18)   | 36.3                 | 39.27                              |
| Colorectal Cancer Screening (ACO-19)  | 72.8                 | 56.14                              |
| Mammography Screening (ACO-20)  | 83.4                 | 61.41                              |
| Proportion of Adults who had blood pressure screened in past 2 years (ACO-21)   | 35.9                 | 60.24                              |
| Beneficiaries with diabetes who met of all the following criteria: Hemoglobin A1c Control (HbA1c) (<8 percent) (ACO-22)   | 78.7                 | 31.5%<br>25.41%                    |
| Beneficiaries with diabetes who met of all the following criteria: Low Density Lipoprotein (LDL) (< 100 mg/dL) (ACO-23)   | 60.6                 |                                    |
| Beneficiaries with diabetes who met of all the following criteria: Blood Pressure (BP) < 140/90 (ACO-24)  | 72.1                 |                                    |
| Beneficiaries with diabetes who met of all the following criteria: Tobacco Non-Use (ACO-25)   | 77.9                 |                                    |
| Beneficiaries with diabetes who met of all the following criteria: Aspirin Use (ACO-26)   | 86.3                 |                                    |
| Percent of beneficiaries with diabetes whose HbA1c in poor control (>9 percent) (ACO-27)  | 11.7                 | 20.35                              |
| Percent of beneficiaries with hypertension whose BP < 140/90 (ACO-28)   | 72.2                 | 68.02                              |
| Percent of beneficiaries with IVD with complete lipid profile and LDL control <100mg/dl (ACO-29)  | 59.7                 | 57.29                              |
| Percent of beneficiaries who use Aspirin or other antithrombotic (ACO-30)   | 88.8                 | 80.79                              |
| Beta-Blocker Therapy for LVSD (ACO-31)  | 71.4                 | 82.71                              |
| Percent of beneficiaries with CAD who met all of the following criteria: Drug Therapy for Lowering LDL-Cholesterol (ACO-32)   | 76.5                 | 68.2%<br>66.90                     |
| Percent of beneficiaries with CAD who met all of the following criteria: (ACE) Inhibitor or (ARB) Therapy for Patients with CAD and Diabetes and/or (LVSD) (ACO-33) | 73.7                 |                                    |
